APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to the provisions of NRS 534.025 and 534.050 (2)(c) and based on the particular hydrologic conditions in the area of the place of use. The water to be diverted under this permit is a result of the rise of ground water caused by secondary recharge and, therefore, does not provide or guarantee the long-term availability for continuous use of this water from this source.

The source of this water is from an existing sump pump located in the bottom level of the Neonopolis Parking Garage. No other point of diversion is allowed. The source of available water is limited to the poor quality, nuisance water perched above the shallow confining layer.

A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of the water placed to beneficial use. The totalizing meter must be installed before any use of water begins.

A quarterly report shall be submitted to the State Engineer within 10 days from the end of each calendar quarter, which shall include the amount of water pumped and a water quality analysis for total dissolved solids (TDS), pH, and sulfates (SO_4^{2-}).

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The total combined duty under Permits 71562 and 71836 shall not exceed 31.35 acre-feet annually.

This permit is issued subject to existing rights. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the amount of water actually placed to beneficial use.

The State retains the right to regulate the use of the water herein granted at any and all times.

(CONTINUED ON PAGE 3)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 0.0433 cubic feet per second, and not to exceed 31.35 acre-feet annually.

Work must be prosecuted with reasonable diligence and be completed on or before:

April 18, 2006

Proof of completion of work shall be filed on or before:

May 18, 2006

Water must be placed to beneficial use on or before:

April 18, 2008

Proof of the application of water to beneficial use shall be filed on or before:

May 18, 2008

Map in support of proof of beneficial use shall be filed on or before:

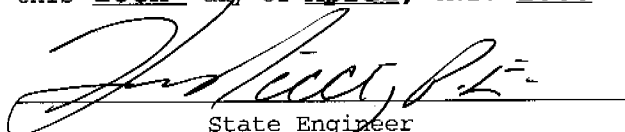

N/A
